Fingerjoint Primed Exterior Trim

The intersection of value and performance.

THE FOREST TRIM DIFFERENCE

Forest Trim is a fingerjointed, edge-glued and primed exterior trim offering a unique combination of stability, versatility, environmental responsibility, and value.

With natural resistance to decay and rot, Forest Trim offers the ideal substrate for outdoor applications.

Forest Trim is sourced from responsibly managed forests to support the market-driven quest for sustainable products.

What does this mean for you? With Forest Trim you get a superior product with years of proven performance to meet the needs of professional contractors and homeowners alike!

IWP OFFERS FOREST TRIM IN A VARIETY OF DIMENSIONS INCLUDING:

- 1 x 3 thru 1 x 12
- 5/4 x 3 thru 5/4 x 12
- 2 x 2 thru 2 x 12
- 2 x 3 sill stock

Forest Trim's 20' length structure means fewer joints on the job site, saving time and money while improving the finished appearance.

Forest Trim features a triple priming process in a controlled environment to ensure consistent coverage. This results in a product that is paint-ready for 2 coats of Exterior Latex Paint.

VERSATILITY

- Wide range of dimensions for any application
- 20' lengths for fewer joints on the job site
- Reversible for smooth or resawn appearance

SUSTAINABILITY

- Forest Trim is sourced from responsibly managed cypress forests

STABILITY

- Engineered to last for years of performance
- Sealed knots for long-term beauty and performance
- 50 year warranty
- Natural resistance to insect & fungal attacks
