

THERMORY®

Excellence in Wood

— DISTRIBUTED BY: —

International Wood Products

2020

Enhancing environments through functional design.

Thermory is the union of science and design. Decking, cladding and porch flooring with unequalled longevity and lasting natural beauty. When you don't want to settle, you want Thermory.

Real wood products with beauty and stability to the core.

► DECKING ► CLADDING ► PORCH FLOORING

Explore the world of **THERMORY®**

04 We Are Thermory

For over 20 years, we've been solving the industry's biggest problems with unequalled innovation and stunning results.

06 Our Footprint

12 Our Benchmark Series

The natural result of our expert modification process is the beautiful, simple Benchmark Series.

16 Profiles

22 Our Rebel Series

Fortune favors the bold. Our Rebel Series products dare you to untame your aesthetic and break the mold of conventional design.

26 Drift

The look of reclaimed wood without the variables and risks. Drift creates a weathered color and texture with the stability you need.

32 Ignite

Ignite by Thermory mimics the traditional look of shou sugi ban with the added benefits of thermal modification.

38 Kodiak

Kodiak by Thermory combines a natural look and feel with impressive size and unequalled durability, for a bold board that rules the forest.

44 Solutions

Our commitment to innovation doesn't end with our wood products. With Thermory, installation and maintenance are easier than ever.

44 Installation & Care

54 Partner Products

56 Case Studies

Thermory products have been used in some amazing ways - see for yourself, then see what you can do with Thermory!

We are Thermory

Delivering superior quality and
unequalled beauty for over

20 years.

Thermory is driven by a desire to lead the industry in innovation and efficiency. Our standards are high, and our process has been proven by decades of consistent performance.

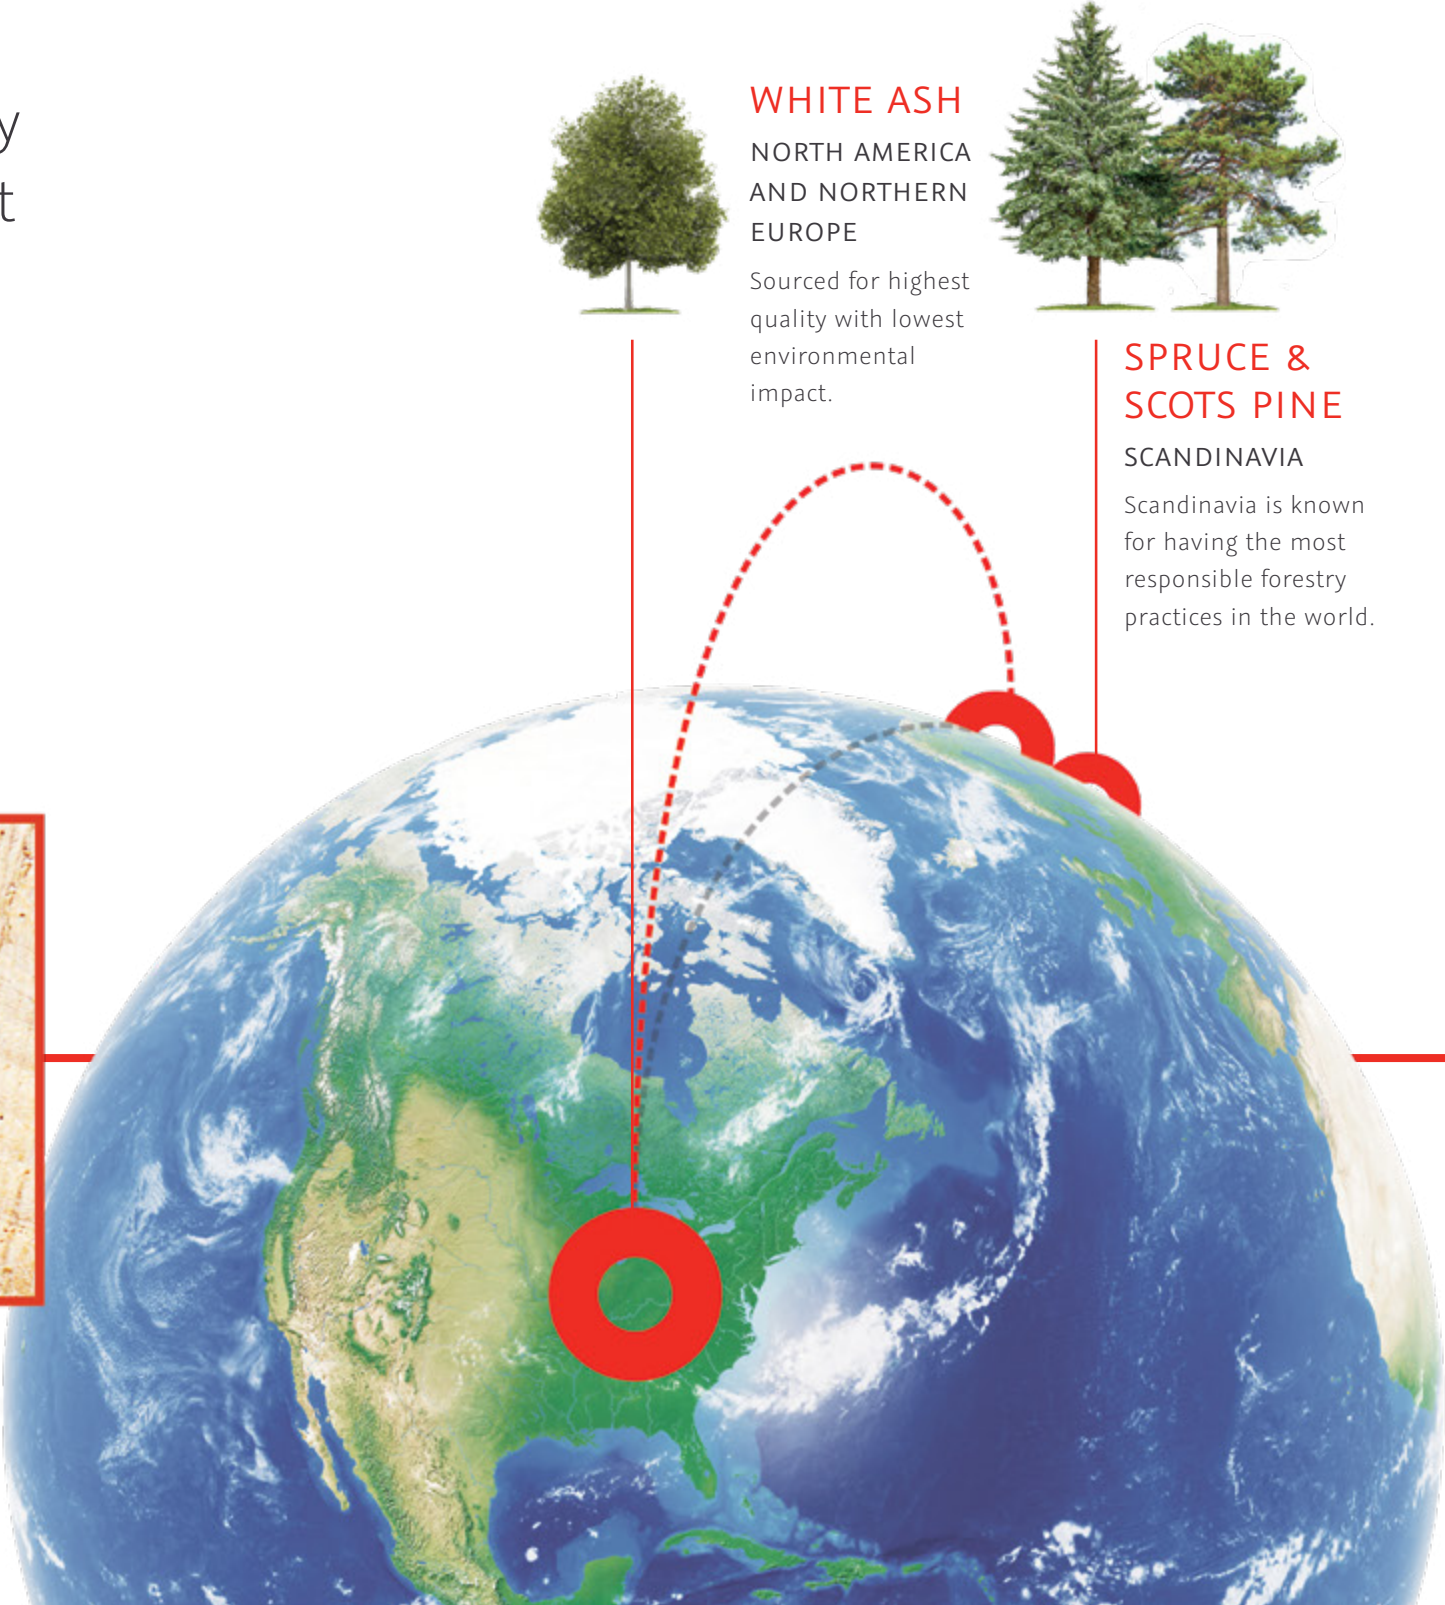

We strive to offer reliable solutions through a deep understanding of our process, products and the needs of our customers. We study the industry and anticipate needs in order to offer valuable product solutions that exceed expectations.

Our commitment to quality control begins the moment the wood is sourced.

We carefully source and select our raw materials in order to preserve forests and provide unrivaled products. Our lumber standards exceed industry grading standards so that our products exceed your expectations.

Clean process, responsible sourcing.
Thermory is driven to maintain a company culture of responsibility.

WHITE ASH

NORTH AMERICA
AND NORTHERN
EUROPE

Sourced for highest
quality with lowest
environmental
impact.

**SPRUCE &
SCOTS PINE**

SCANDINAVIA

Scandinavia is known
for having the most
responsible forestry
practices in the world.

Diverse global sourcing
allows for insurance
against environmental and
biological threats (such as
the emerald ash borer).

Fuel-efficient shipping.
Boards are modified in
Estonia and shipped to the
US by water - 10x more
efficient than trucks.

We're committed to **sustainability**
from start to finish.

We naturally enhance each board
using **only** heat and steam.

Our process sets the bar and challenges the industry to **try to keep up.**

One of our thermal modification chambers located in our Estonia factory.

Owning Our Technology

Our proprietary process uses advanced technology and 20,000 square foot chambers to yield consistent, superior results in every batch.

Masterminding The Process

Our wood scientists control our modification process and tirelessly pursue perfection in every board. From temperature to fan speed, each batch is tailored to optimize results.

Creating Superior Products

Our wood scientists and proven process come together to create products that change the landscape of the wood industry - products that offer valuable solutions to the problems you face.

Rot Resistant

Each board is naturally enhanced for significantly reduced moisture absorbency.

Exceptional Durability

Rot resistance that few products, exotic or engineered, come close to equalling.

Smooth-Kissed Milling

Each board is smooth, straight and reliable. Touch it, feel it, love it.

Thermory Takes Testing Seriously

Our products are consistently proven through third-party test results.

ROT RESISTANCE

STABILITY

FIRE

STRENGTH

TERMITE

Complete modification of every fiber.

Our process modifies each board completely, all the way through the core, leading to unequalled durability and stability. At Thermory, we leave no fiber unaltered.

Beautifully Simple, Remarkably Durable

You know that you shouldn't have to choose between a stunning aesthetic and reliable performance. Between real wood and durability. Between sustainability and workability. You deserve a material that checks all the boxes, including a couple you didn't know could be checked.

We created the Benchmark Series because it's the beautiful, natural wood product you deserve. The product that doesn't force you to settle or compromise. Benchmark is for those who demand more.

This is the Benchmark Series.
The bar has been raised.

The Bold Look You Want.

You want to be a boundary pusher. After all, you didn't work this hard to tread softly on well-worn paths. Your projects tend to break the mold, creating something unique and memorable each time.

The Rebel Series of products offers bold looks for those looking to tear up the map and create an aesthetic all their own. From daring finishes to striking textures, the Rebel Series dares you to defy convention without sacrificing performance.

This is the Rebel Series.
Untame your aesthetic.

Drift - Black Pearl

Drift

Defying Convention

Patience may be a virtue, but passion can make you restless. Drift gives you a headstart on getting the rustic, silver finish you'd otherwise have to wait years to achieve. Because you know what? Sometimes virtue is overrated.

APPLICATIONS

► CLADDING

SPECIES

► SPRUCE

COLOR

✱ Drift comes in a variety of realistically-weathered colors.

Drift uses thermally modified spruce to create a stunning product with a 25+ year rot resistance rating.

Drift offers the look of reclaimed wood without the unknowns. Brushed and stained for a realistically-weathered look with a high degree of dimensional stability.

ignite

Ancient Tradition,
Modern Performance.

Hundreds of years ago, Japanese woodworkers prolonged the life of wood by charring the surface, known as shou sugi ban. Ignite offers the traditional look of charred wood with a deceptively flame-free process.

Ignite by Thermory offers the shockingly realistic look of charred wood, without the flames.

APPLICATIONS

▶ CLADDING

KODIAK

The Most Rugged Board In The Forest.

In the islands of an Alaskan archipelago, the Kodiak bear rules the forest. The largest of the brown bears, an encounter with a Kodiak bear is sure to astonish. Kodiak by Thermory combines a natural look and feel with impressive size and unequalled durability, for a bold real wood board that rules the forest.

APPLICATIONS	SPECIES	COLOR
▶ DECKING ▶ CLADDING	▶ SPRUCE	▶ GOLDEN BROWN

Knotty spruce boards retain their natural appeal, while their extra wide size allows for faster installation. The brushed texture adds ruggedness without sacrificing the refined look you crave.

Unlike other softwood products, Thermory's thermal modification process ensures there's no visible sapwood – just the consistent color of heartwood from edge to edge.

Installation Features

JEM Joints

Install decking, cladding and porch flooring without being held hostage by joist requirements. Thermory's JEM Joints don't have to rest on joists, so they reduce waste, labor costs and installation time.

Expansion Beads

Our porch flooring is designed with innovative expansion beads, giving floors the flexibility required to prevent buckling and warping as the environment changes. Install with confidence.

Installation Systems PaCS

Just Press and Click!

Press and Click Strips, or PaCS, let you easily and quickly install cladding without damaging drill bits or wasting product. Pre-grooved boards allow for automatic alignment without any visible screws, and 350lbs of resistance per clip offers the flawless, durable result you've been dreaming of.

- ▶ Depth - .75
- ▶ Width - 1.94
- ▶ Length - 90
- ▶ Clips come pre-attached for even easier installation.

Installation **Systems PaCS**

1

THE BOARD

Each PaCS board comes with pre-grooved PaCS Tracks.

Boards are thermally modified for decades of rot resistance and stability, and each PaCS Track aligns perfectly with the strips.

2

THE STRIP

Designed to fit each PaCS board perfectly.

PaCS Clips come pre-attached to marine-grade plywood furring strips. Install these as you would any other furring strip.

3

THE CLICK

Just press, click, and you're done!

Press each board onto the furring strips. PaCS Clips and PaCS Tracks align flawlessly, every time.

Photography by Carpentier

Installation Systems

Furring Strips

Protecting homes from trapped moisture is critical.

Quarrix furring strips allow moisture and air to pass freely behind siding, creating a natural rain screen system. Unlike similar wood products, Quarrix furring strips don't warp or split, and bugs hate 'em. Thermory is proud to recommend Quarrix furring strips for many of our cladding installations.

- ▶ PREVENT TRAPPED MOISTURE
- ▶ EXTEND THE LIFE OF YOUR CLADDING
- ▶ ELIMINATE THE NEED FOR ADDITIONAL BUG SCREEN

A better solution to wood furring.

Whether you choose the sophistication of Thermory Benchmark cladding, or break the mold with the Rebel Series, your cladding projects deserve a strong, ventilated drainage plane to protect against moisture-related problems.

Thermory recommends Quarrix furring strips for all cladding projects. **Why?**

- ▶ RESISTANT TO WARPING, SPLITTING, MOLD AND MILDEW
- ▶ VERTICAL AND HORIZONTAL AIR VENTS FOR FREE AIR FLOW
- ▶ NATURAL RAIN SCREEN SYSTEM
- ▶ DIMENSIONALLY DIE CUT FOR EXCEPTIONAL CONSISTENCY
- ▶ CRUSH RESISTANT
- ▶ SUPERIOR DRAINAGE
- ▶ MADE IN THE USA

Maintenance

Maintaining your Thermory project is as simple as you want it to be!

Each Thermory board is durable and stable without needing intervention from oils, stains or other protective products. Left alone, it will simply age to grey and stay rot-resistant and warp-free for decades. However, if you prefer the original color of the wood, a regular maintenance routine can keep it shiny and new!

- 1 OIL. OR NOT.**
Oiling with Cutek Extreme mixed with a UV protectant Colourtone as-needed (approximately every 12mos. depending on climate) to retain the original color.
- 2 POWERWASH. IF NEEDED.**
Power-washing with Cutek Proclean will rejuvenate the original color of the boards. Be sure to follow the instructions carefully.
- 3 SWEEP. JUST SWEEP.**
Were you expecting a more complicated 3rd option? For decking and porch flooring, just keep it reasonably clean, and allow it to age.

Cutek Extreme is a unique protection oil to keep Thermory protected for many years.

It minimizes warping, cupping and splitting to keep your project in top shape with minimal maintenance. Cutek Extreme is simple to apply and easy to maintain, and is especially well-suited for thermally modified woods, which is why it's the protection oil Thermory recommends for our own products!

Pre-oiling is available! We can apply Cutek to Thermory in a climate-controlled facility, delivering our product factory-coated on all six sides for the best possible protection and consistency of application.

[Buy Now >](#)

Add Colourtone for UV protection and color tinting.

Anova Furnishings

Anova is a leading furnishings provider that creates first and lasting impressions using sustainable materials.

They are committed to creating high-design, fine-quality products that achieve sustainability goals and LEED certification, which is why they choose Thermory ash materials for a number of their products.

HDG Building Materials

HDG Building Materials is a single-source provider for Thermory deck tiles. When it comes to wooden deck pavers, HDG trusts the quality and longevity of Thermory ash.

The Gardens by the Mandalay, Dallas, TX

Environmental sustainability was important for this innovative rooftop garden. The 23,306 linear feet of beautiful winding walkway from Thermory provided LEED points while offering the long-lasting, low-maintenance stability required.

The Thermory Reach

Thermory has been distributing our unequalled modified wood products around the globe for over 20 years. We've installed over 200 million square feet of our products on every continent! Our headquarters are in the USA and Estonia, but our reach is global!

Thermory creates
unequalled wood solutions.

Our truly natural products have no equal, and
may just change the way you think about wood.
