About Us

Our goal at Starborn is to provide professional contractors, as well as, leading building materials distributors and dealers nationwide with quality construction fasteners and innovative fastening solutions that bring value to their business.

Founded in 1961, Starborn Industries originally provided wood products to the building industry, but by the early 1980's construction fasteners became our primary product line. Since the late 1990's, Starborn has focused its fastener line on deck fastening solutions. We carefully monitor the decking industry and work closely with decking manufacturers to ensure the best fastening solutions for all types of deck installations as shown by our current offering of proprietary and patented products. These include CAP-TOR® xd, DECKFAST®, PRO PLUG® SYSTEM, SMART-BIT®, and others as shown in this catalog. New product development is continuous and ongoing. Our constant goal of inventing and providing innovative fastening solutions has made Starborn a leading provider of fasteners in the decking industry worldwide. We are the deck fastening specialists.

To Our Customers

We value your business. We value your relationship. Your success is our success. Our commitment is to continue to provide you with superior service and knowledgeable support for all of your fastener needs.

Starborn Industries is located in Edison, NJ and is an independent, second generation family-owned and operated business.

STARBORN[®] STRUCTURAL

Code Compliant Wood Screws

APPLICATION

Starborn[®] Structural screws are fully tested and code compliant alternatives to traditional lag screws and through-bolts, with no predrilling required. Designed to save time and reduce labor, these structural screws can be used in a variety of applications including deck ledgers, deck substructures, landscape timbers, fences, pergolas, carrying beams, timber frames and more.

FEATURES

- IRC/IBC code compliant (DrJ TER 1703-05)
- No predrilling
- Superior design values and performance
- Speed-Knurl™ reduces friction for faster installation
- Tri-Forge[®] Point allows for fast start and reduces driving torque

INSTALLATION

- Starborn[®] Structural screws should be installed using an impact driver or high-torque low speed drill.
- Predrilling is not required, but can be used where lumber is prone to splitting.
- For the H19 screw drive until washer head is flush to wood surface or countersink head flush.
- For the F19, H23, and F23 screws drive until washer is drawn firm and flush. Do not overdrive or countersink

TECHNICAL GUIDES

TECHNICAL GUIDE	PRODUCT

Clip&Rip™

Universal Hidden Deck Clip

APPLICATION

Clip&Rip™ universal hidden deck fasteners secure inner decking boards quickly and effectively while maintaining a clean, fastener-free finish. Clip&Rip™ comes pre-loaded with stainless steel screws and assembled in ready-to-install strips saving time and money.

FEATURES

- For use with grooved composite, PVC and wood decking in any deck pattern.
- Pre-assembled in collated “sticks” of 16 for increased installation speed and ease of use.
- Clip creates 3/16” spacing between boards
- 305 and 316 stainless steel screw options available
- T15 driver bit included

INSTRUCTIONS

- Insert the strip of clips with the  arrow pointing forward into the leading board groove. Center over joist.
- Drive the screw down in a straight and steady fashion until the head of the screw is flush with the clip.
- Lift up on strip to break off installed clip.
- Install clips at every joist along length of board.
- Place next board into position. Holding the deck board at a slight angle, push deck board into previously installed clips. Check gapping between boards to ensure consistency.

ESTIMATED COVERAGE

JOIST SPACING	100 SQ. FT. (AREA)	200 SQ. FT. (AREA)	300 SQ. FT. (AREA)	400 SQ. FT. (AREA)	500 SQ. FT. (AREA)

STARTER CLIP INSTRUCTIONS

- For first and last boards, screw a starter clip at every joist.
- Once all starter clips are installed, push the first deck board into the starter clips.
- Proceed to fasten remainder of boards with standard clips.

*Starter clips are only available in 305 stainless steel

DECKFAST®

Epoxy

Exterior Wood Screw

APPLICATION

Color Matched Screws for Pressure Treated Lumber and PVC Trim.

- Flat Head—For use in pressure treated decking.
- Trim Head—For use in pressure treated trim and finish applications.

FEATURES

- For excellent corrosion resistance and color matching with various types of treated lumber and PVC trim (Gray, Green, Red, Tan, White)
- Lengths from 1-1/4" to 6"
- Reinforced flat or trim head with nibs for better countersinking
- Extra deep star drive recesses to prevent cam-out
- Type 17 auger tip for faster, easier insertion and to help prevent splitting

INSTALLATION

- Install flush with decking surface. Do not overdrive.
- Install two screws per joist.
- Predrilling is recommended when fastening within 1-1/2" from the end of a deck board.

FINISH

Epoxy Coated

CORROSION

Exterior use—Approved for use in ACQ and pressure treated lumber.

DECKFAST®

Stainless Exterior Wood Screw

APPLICATION

Stainless steel screws for hardwood, cedar, redwood and pressure treated decking.

- Flat Head—For hardwood, cedar, redwood and pressure treated decking.
- Trim Head—For hardwood, cedar and redwood; pressure treated trim and finish applications.

FEATURES

- Grade 305 and Grade 316 stainless steel for superior corrosion resistance
- Lengths from 1-1/4" to 3-1/2"
- Reinforced flat or trim head with nibs for better countersinking
- Extra deep star drive recesses to prevent cam-out
- Type 17 auger tips for faster, easier insertion and to help prevent splitting

INSTALLATION

- Predrilling required for hardwoods and in all cases when fastening within 1-1/2" from the end of a deck board.
- Slightly countersink screw head. Do not overdrive.
- Recommended: For a clean and professional finish use SMART-BIT® Predrilling and Countersinking Tools in combination with screws.

FINISH

CAP-TOR[®] xd

Epoxy/Stainless

Composite/PVC Deck Screws

APPLICATION

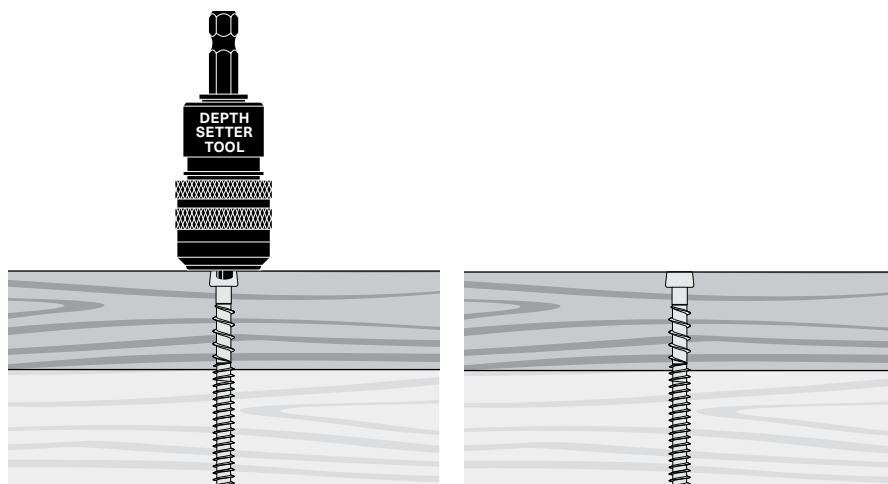

Color matched deck screw available in a variety of colors to match all of the leading composite/PVC deck boards and cladding on the market.

FEATURES

- Extra deep star drive recess to prevent cam-out
- Undercut head to cut cleanly through the hard outer layer of capstock decking
- Reverse threads to prevent mushrooming and surface defects
- Tri-lobular shanks and thread to reduce driving torque
- Type 17 auger tips for faster, easier insertion and to help prevent splitting
- Available in a variety of colors

INSTALLATION

- Install flush with decking surface. Do not overdrive.
- Install two screws per joist.
- Predrilling is recommended when fastening within 1" from the end of a deck board.
- Recommended: For a clean and professional finish use the SMART-BIT[®] Depth Setter Tool in combination with screws.

Metal

Composite/PVC

Deck Screw For Metal Framing

APPLICATION

Color matched screws for attaching composite/PVC decking and cladding to steel or aluminum framing.

- 10 x 1-1/2": 3/4" to 1" decking material attached to 16–20 gauge joists or furring.
- 10 x 1-5/8": 3/4" to 1" decking material attached to 12–18 gauge joists or two 14 gauge joists doubled up.
- 12 x 2-3/8": 1" to 1-1/2" decking material attached to up to 1/4" thick joists.

FEATURES

- Epoxy coated Grade 410 stainless steel
- Sharp drill point for quick installation into metal framing
- Extra deep star drive recess to prevent cam-out
- Undercut head to cut cleanly through the hard outer layer of capstock decking
- Available in a variety of colors

INSTALLATION

- Install flush with decking surface. Do not overdrive.
- Install two screws per joist with a minimum three threads beyond metal framing.
- Predrilling is recommended when fastening within 1" from the end of a deck board. Pre-drill decking only, not joist.

FINISH

Epoxy coated

CORROSION

Exterior use—Approved for use in ACQ and pressure treated lumber.

FASCIA SYSTEM

Epoxy/Stainless

Fascia Screw

APPLICATION

Color matched fastening system for composite/PVC deck fascia and cladding. The system securely fastens fascia material while also allowing boards to expand and contract freely. Installation is a two-step process utilizing a pre-drilling tool and screws.

FEATURES

- Designed for use with 1/2" to 3/4" composite fascia profiles
- Fascia Tool creates an over-sized hole so that the board can expand and contract freely and provides a pre-set countersink that matches the head diameter and depth of the Fascia Screw
- Free spinning collar on Fascia Tool prevents damage to the fascia board surface
- Type 17 auger tips for faster, easier insertion and to help prevent splitting
- Available in a variety of colors

INSTALLATION

Follow all fascia manufacturer instructions, including specifications for screw spacing, edge/ end distances, and gapping.

- Pre-drill with the Fascia Tool until the collar stops spinning.
- Drive the Fascia Screw until snug, do not overtighten. The material should hang from the screw to allow for expansion and contraction.

FINISH

Epoxy coated
Grade 305 Stainless

CORROSION

Exterior use—Approved for use in ACQ and pressure treated lumber.

For salt water or other areas where corrosion is a concern, use Grade 316 Stainless.

PRO PLUG SYSTEM®

Deck

Hidden Fastener For PVC/
Composite Decking and Cladding

Patented

APPLICATION

Hidden fastening system that provides a secure face-fastened connection with precision cut plugs made from actual decking and cladding materials. Installation is a two-step process utilizing a setting tool, screws and plugs. All components must be used together as instructed to ensure proper function.

FEATURES

- Plugs are for 1" nominal (or greater) material and available in all leading deck and cladding brands
- Available in Kits (screws, plugs and tool) and Inventory Management (system components sold separately)
- Patented PVC/Composite Tool with Auto-Stop™ sets screw to the correct depth without stripping screw recess
- Free spinning stop collar on setting tool prevents damage to the board surface
- Screws feature a Type 17 auger tip for faster, easier insertion and to help prevent splitting

INSTALLATION

Follow all decking and cladding manufacturer instructions, including specifications for screw spacing, edge/end distances, and gapping. Predrilling is recommended for all composite deck boards. Predrill a 3/16" pilot hole through the decking material only; not the joist. For Armadillo®, DuraLife®, NewTechWood® and Sylvania® decking, use a 7/32" pilot hole.

- Fit setting tool with application specific driver bit, marked "DECK".
- Drive the screw with the PVC/Composite Tool using a standard drill on high speed.
- Do not use impact driver with setting tool.
- The setting tool's Auto-Stop™ mechanism will make a "pop" sound when the screw is set to the correct depth. (Do not hesitate or slow down while driving.)
- Insert plug into hole and tap with a smooth-faced hammer until the plug is flush with board.

FINISH

Epoxy coated
Grade 305 Stainless
Grade 316 Stainless

CORROSION

Exterior use—Approved for use in ACQ and pressure treated lumber.

For salt water or other areas where corrosion is a concern, use Grade 316 Stainless.

PRO PLUG SYSTEM[®]

Fascia

Hidden Fastener for Composite Fascia Board and Cladding

APPLICATION

Hidden fastening system that securely fastens deck fascia and cladding while also allowing boards to expand and contract freely. Precision cut plugs are made from actual fascia material. Installation is a three-step process utilizing a predrilling tool and a setting tool (sold as a tool set) and screws and plugs. All components must be used together as instructed to ensure proper function.

FEATURES

- Fascia Plug Tool predrills an over-sized hole so that the board can expand and contract freely and provides a pre-set countersink that matches the diameter and depth of screw and plug
- Free spinning stop collar on Fascia Plug Tool prevents damage to the board surface
- PVC/Composite Tool with Fascia Bit sets screw to proper depth and eliminates overdriving screw
- Screws feature Type 17 auger tip for faster, easier insertion and to help prevent splitting
- Kit packaging includes screws and plugs (Fascia Plug Tool Set sold separately)

INSTALLATION

Follow all fascia manufacturer instructions, including specifications for screw spacing, edge/ end distances, and gapping.

- Fit setting tool with application specific driver bit, marked "FSCA".
- Predrill with the Fascia Plug Tool until the collar stops spinning.
- Drive the screw with the PVC/Composite Tool using a standard drill on high speed.
- Do not use impact driver with setting tool.
- The setting tool's Auto-Stop™ mechanism will make a "pop" sound when the screw is set to the correct depth. (Do not hesitate or slow down while driving.)
- Insert plug into hole and tap with a smooth-faced hammer until the plug is flush with board.

FINISH

PRO PLUG SYSTEM®

Wood

Hidden Fastener for Wood Decking and Flooring

APPLICATION

Hidden fastening system that provides a secure face-fastened connection with precision cut, face grain plugs made from a variety of hardwood decking and flooring. Installation is a four step process utilizing a predrilling tool, glue (sold separately), screw and plug.

FEATURES

- Provides the strength of top-down fastening with the high end finish of face grain wood plugs
- Drill, screw, glue and plug all types of hardwoods in a fraction of the time compared to traditional plug methods
- Patented Wood Tool creates a screw hole, countersink and counterbore to match other system components
- Free spinning stop collar on Wood Tool prevents damage to the board surface
- Patented glue nozzle applies glue to the sidewall of the counterbored hole
- Kit packaging includes screws, plugs and glue nozzle (Wood Tool sold separately)

INSTALLATION

Follow all decking and flooring manufacturer instructions, including specifications for screw spacing, edge/end distances, and gapping.

- Predrill with the countersinking Wood Tool using a corded drill on high speed until the collar stops spinning. Remove debris from hole.
- Drive screw so that it is fully seated in the countersink. (Do not overtighten.)
- Fit glue nozzle on glue bottle. Apply glue to hole by pushing down and gently squeezing the bottle while rotating it one quarter turn, then remove. Glue should coat the side walls of the hole.
- Insert plug into hole, align grain of plug to match grain of board, and tap with a smooth-faced hammer until the plug is flush with board.

SMART-BIT®

Predrilling and Countersinking Tool

For use with HEADCOTE®
and DECKFAST® Stainless Screws

Patented

APPLICATION

Designed for decking and general woodworking when materials require predrilling. Tools are engineered to match precisely with HEADCOTE® and DECKFAST® stainless steel screws to provide a clean and professional finish.

FEATURES

- Perfect for use with hardwoods like ipe, mahogany, meranti and merbau
- Pre-set countersink matches head shape of HEADCOTE® and DECKFAST® stainless steel screws
- Free spinning stop collar protects board surface
- Durable ball bearing assembly
- Replaceable Powerbolic® fluted drill bits that cut through decking more than twice as fast as standard wood bits

CORRECT USE

- Choose the tool size gauge that matches the diameter and head style of screw.
- (The 1-1/8" overall hole depth is sufficient for installing decking material up to 5/4 nominal (30mm thick))
- Drill in a straight and stable fashion.
- The hole is complete when the collar stops spinning.

REPLACING BITS

- Disconnect power and remove the SMART-BIT® Tool from the drill.
- Loosen the set screw with the included hex wrench.
- Remove old bit and insert a new bit fully into the countersink portion with the flat side facing the set screw.
- Tighten the set screw.
- Use only SMART-BIT® Powerbolic® replacement bits.

DIMENSIONS

TOOL SIZE GAUGE (MM)	HEAD STYLE	DRILL BIT MM (INCH)	COUNTERSINK DIA. MM (INCH)	COUNTERSINK ANGLE	HOLE DEPTH* MM (INCH)
#7 (4.2)	Trim	3.0 (7/64")	6.2 (1/4")	60°	30 (11/8")
#8 (4.5)	Trim	3.2 (1/8")	6.6 (17/64")	60°	30 (11/8")
#8 (4.5)	Flat	3.2 (1/8")	8.4 (21/64)	82°	30 (1-1/8")
#10 (5.0)	Flat	3.6 (9/64")	9.2 (23/64")	90°	30 (11/8")
#12 (5.5)	Flat	4.0 (5/32")	11 (7/16")	82°	40 (19/16")
#14 (6.2)**	Flat	5.25 (13/64")	12.9 (1/2")	82°	40&75 (19/16"&3")

*Overall hole depth including countersink portion. When installing decking it is general practice to not pre-drill the underlying (joist) material; this is usually treated lumber and does not require pre-drilling. The 11/8" overall hole depth is sufficient for installing decking material up to 5/4 thick (nominal).

**The #14 Smart-Bit® comes with two 40mm bits and one 75mm bit. Durable ball bearing assembly

ALSO AVAILABLE FOR FIBER CEMENT

Designed specifically for use with compressed fiber cement board, but can also be used with a variety of fiber cement and masonry products.

- Tungsten carbide tip
- Durable ball bearing assembly
- Free spinning stop collar
- Use with #10 (5.0mm) flat head screws

SMART-BIT®

Depth Setter Tool

Driving Tool for Setting Screws to the Perfect Depth

Patented

APPLICATION

Designed to drive screws to the perfect depth—flush or below the work surface—every time. Adjustable and easy to use on decks, drywall and in general construction. The tool works with Phillips® and Torx® bits and is designed for use with Starborn® fasteners and other screw products.

FEATURES

- Perfectly set screws every time
- Locking rings allow for screw depth adjustment and secures desired setting for consistent screw installation
- Auto-Stop™ mechanism sets screw to the correct depth without stripping screw recess
- Free spinning stop collar prevents damage to the board surface

CORRECT USE

- Use a standard drill. Do not use an impact driver.
- Drill in a straight and stable fashion.
- The screw is set when the Auto-Stop™ mechanism engages fully (making a “pop” sound in most materials).

REPLACING BITS

- Disconnect power and remove the SMART-BIT® Tool from the drill.
- Loosen the set screw with the included hex wrench.
- Remove old bit and insert a new bit fully into the countersink portion with the flat side facing the set screw.
- Tighten the set screw.
- Use only SMART-BIT® Powerbolic® replacement bits.
